EMS strengthens national partnership with TIP Group

EMS Truck & Trailer Parts is delighted to announce that as part of our long-standing and ongoing agreement with TIP Group, we will be supplying the TIP Refurbishment Centre at TAG Stoke-on-Trent through an on-site facility. We would also like to welcome our 3 new colleagues on site, to the EMS team.

In addition, EMS has agreed a long-term extension of our partnership with TIP across the whole of the UK network.

The unique 12.75-acre facility enables operators to extend the lifespan of their trailers, effectively giving them a 'second life'. The capability to refurbish to an 'as new' condition offers a sustainable alternative to acquiring newly manufactured replacements, supporting the growing Environmental, Social and Governance (ESG) aspirations that EMS and operators have.

The centre is dedicated to offering all aspects of trailer refurbishment, from merely cosmetic to technical and mechanical upgrades. With 41 bays in operation, and a team of over 100 trained technicians, the facility is currently refreshing curtainsiders, box-vans, reefers, chassis and flat beds.

Mark Lynch Managing Director of EMS Truck & Trailer Parts commented "This is a fantastic opportunity that reflects our strong relationship with TIP and our shared commitment to growth, excellence, and advancing our ESG goals."
